DIRTY DUCTS? LET'S TALK!

Actual before
 and after photos
 taken by our team.

Typically dust, dirt and stubborn stuff stuck in your home's ductwork doesn't just lay there ready to get out of your house. It holds onto the ductwork. That icky stuff makes your home **its** home.

**DON'T JUST TRY TO SUCK OUT THE DUST AND DIRT.
 BRUSH IT OFF AND GET IT OUT.**

Our Howald duct cleaning team uses Rotobrush technology to clean each individual vent. The brush pulls the gunk off the sides of the ductwork and then sucks it out.

**CAN'T YOU SMELL THE FRESH AIR IN YOUR HOUSE ALREADY?
 DON'T IMAGINE IT, DO IT!**

Call now to set your appointment. We'll get you a fair price when we see the size of your house, age of the ductwork and where all those vents are hiding. (Heck, we're even giving you a coupon to save right below on this handy informational flyer!)

READY TO ROTOBURSH? WE ARE!

The day of your cleaning we'll use our Rotobrush cleaner. The machine is about 2-by-3 feet tall and wide with a 30-foot hose that's topped off with a brush. The machine is moved around your home on a compact red cart. We will go from vent to vent brushing and sucking out all that stuff you want cleaned out. We're also equipped with a handy ShopVac for close-range cleaning and clean up.

WHAT'S THE BENEFIT TO YOU?

We hope you'll be able to check one of these boxes (and be sure to tell us how we did).

- Cleaning and dusting less.
- Fewer allergy-type symptoms.
- Energy use improvements.
Give that HVAC system a break.
- A pleasant-smelling and clean home.

* Cannot be combined with other offers.
